Hydraulic Wheel/Brake Dolly

Designed for Precision Maneuverability in Confined Workspaces

Design Features

- Prevents lost flight time due to damaged axles, wheels or brakes
- Avoids lost work time due to back or hand injuries
- Allows for easy one-person tire changes
- Maneuvers easily around/behind gear doors and axle threads with low profile design
- Provides easy alignment of brake keys with wheel rotation on grooved machined rollers
- Converts to brake dolly with optional adapter
- Stores wheel changing tools on handy storage tray

Technical Data

- Adjusts for tire widths from 4 to 12 inches
- Handles wheel diameters from 25 to 40 inches
- Supports tires up to 350 lbs
- P/N #: HWD-40 Description: Hydraulic Wheel Dolly
- P/N #: BD-20 Description: Brake Attachment

Brake Dolly conversion with optional attachment
