# Aviation Tire Cage

The Aviation Industry's only designed and tested Tire Cage.  
OSHA & Military Compliant

- Protect employees from injuries
- Prevent costly hangar damage
- Reduce AOG time due to aircraft damage

## Heavy Duty Design Features

- 1/4" steel plates in a dual clam shell design provide 1/2" protection on four critical sides with vented roof and floor for air release
- Dual clamshell door design provides easy to use access while offering uncompromised strength and protection
- 3/4" hinge pins and nine segment hinge design connect six 50,000 pound safety straps that equalize force absorption
- Stainless steel dual 7/8" pin "Bank Vault Design" door latch and motion hardware strengthens door opening
- Custom manifold provides triple over pressurization safety
- Enclosed container contains debris during over-inflation incidents
- Corrosion resistant, durable powder coat finish and stainless steel hardware for low maintenance and smooth operation
