

Falcon Tooling

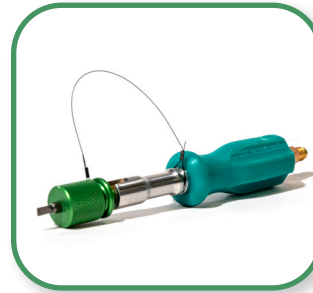

Refined Designs for Easy Use and Functionality

Falcon 50.900.2000 Main Gear Jack Adapters

P/N: FMGJA

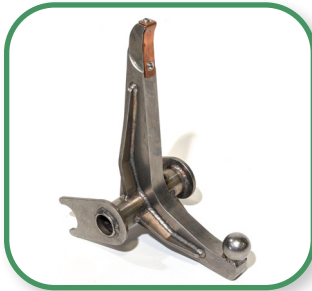

- Load tested for quality assurance
- Non-marring main gear “UHMW” strut shoe
- Integrated “single piece” strut shoe design

Oxygen Fill Adapter 3 in 1 Tool for O2 Needs

P/N: OFA

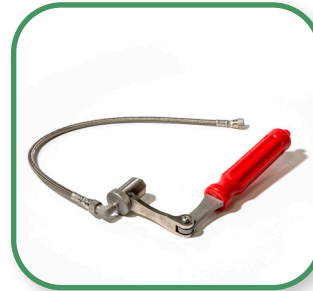

- Functions as fill port adapter, safety cap wrench and screw driver
- Prevents service port thread damage
- Assures tight seal before servicing oxygen
- Large handle prevents over-tightening

Falcon 50.900.2000 Nose Gear Jack Adapters

P/N: FNGJA

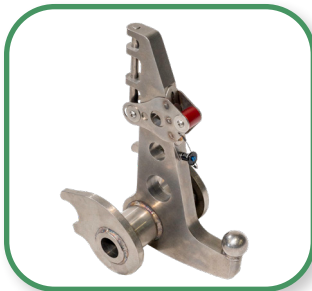

- Load tested for quality assurance
- Non-marring copper shoe with lower attach point
- Stainless steel construction

Falcon Strut Fill Adapter

P/N: FSFA

- Handle provides storage for fittings and seals
- Counter weighted design prevents tool being accidentally left attached to aircraft
- Large thumb wheel for easy installation

Falcon 7X Nose Gear Jack Adapter

P/N: FNGJA7X

- Each production run load tested
- Safety latch pin to ensure attachment to aircraft
- Improved ergonomics with front side latch operation
- Stainless steel construction

Falcon Actuator Backlash Tool

P/N: FBL

- Tool fits all 3 jack screw diameters
- Provides superior ergonomics -long indicator pointers and large face dials
- Long pointer saves time from unnecessary fairing removal

Falcon Spanner Sockets

- Stainless steel construction
- Versions available for Falcon 50, 900, 2000 and 7X
- Double side design – one tool for Main & Nose wheels

Falcon Spring Loaded Fairing Tool

P/N: FSLF

- Designed for stability and safe use
- Prevents scratching painted finish
- Can be used on both sides without adjustment
- Easy installation with completely self-adjusting design
