

Gulfstream Nose/Main Wheel Spanner Socket Kit

Design Features

- Superior low profile ergonomic design
- Lifetime warranty
- Stainless steel construction
- Gulfstream approved Aircraft Model(s)
GII, GIII, GIV, GV, G350, G450, G550, G650

The GS2K Kit Includes:

- Spanner Socket
- Custom sized LED Flashlight
- Custom molded foam lined storage case

The Nose/Main Wheel Spanner Socket Kit is used to install and remove nose and main landing gear wheels on GII, GIII, GIV & G450. It is also used to install and remove nose landing gear wheels on GV, G550 and G650. The low profile design and strategically placed sight holes allow for easy alignment of the axle nut lock bolts. The top flashlight port holes are machined to fit an included LED flashlight. This flashlight lights up the visually limited lock bolt installation area. This is the perfect product for your “Fly Away” tool kit.
