

Hydraulic Wheel Dolly & Brake Attachment

Designed for Precision Maneuverability in Confined Workspaces

Design Features

- Allows for easy one-person tire changes
- Avoids lost work time due to back or hand injuries
- Provides easy alignment of brake keys with wheel rotation on grooved machined rollers
- Prevents lost flight time due to damaged axles, wheels or brakes
- Maneuvers easily around/behind gear doors and axle threads with low profile design
- Converts to brake dolly with optional adapter
- Stores wheel changing tools on handy storage tray

Technical Data

- Adjusts wheel width from 4" to 12"
- Handles wheel diameters from 25" to 40"
- Supports tires up to 350 lbs
- **P/N HWD-40** Description: Hydraulic Wheel Dolly
- **P/N BD-20** Description: Brake Attachment (optional)
