Heavy Duty Design Features

- 1/4" steel plates in a dual clam shell design provide 1/2" protection on four critical sides with vented roof and floor for air release
- Dual clamshell door design provides easy to use access while offering uncompromised strength and protection
- 3/4" hinge pins and nine segment hinge design connect six 50,000 pound safety straps that equalize force absorption
- Stainless steel dual 7/8" pin "Bank Vault Design" door latch and motion hardware strengthens door opening
- Custom manifold provides triple over pressurization safety
- Enclosed container contains debris during over-inflation incidents
- Corrosion resistant, durable powder coat finish and stainless steel hardware for low maintenance and smooth operation

User Friendly

Easy Tire Entry - 4" ground clearance

Hands Free Tire Inflation - External gauge panel and nitrogen fill port

Cage Accommodates - tire sizes up to 35" x 11" x 18"

Includes: 3 quick disconnect fill fittings, internal hose and full flow tire fill fitting

Safety Compliance

- OSHA compliant 1910.177
- Army exceeds TM 55-2620-200-24
